

When choosing Telenor it is possible to tailor your company's mobile telephony. You may freely combine Business All Inclusive with our other Business subscriptions to ensure that all employees obtain a subscription that fits to their needs.

### Business All Inclusive makes it easy to talk

Business All Inclusive is a very simple subscription with unlimited usage at a fixed price – and the invoice will include no surprises. There are no call charges and with 50 MB of included data traffic every month, there are good opportunities to send and receive e-mails via your mobile phone.

### For people who talk much

Free usage makes Business All Inclusive an excellent choice for employees who use their mobile phones a lot for work.

### Mobile telephony with a discount

With Business All Inclusive it is possible to obtain a discount which is very clear: The discount will increase with the number of subscriptions and longer binding periods. You may choose between binding periods of 12, 24 and 36 months in your agreement.

“Excellent for people who use their mobile phone a lot in their daily work.”

Michael Garver Burggaard  
Sales Director  
Telenor Business
