

Control your usage and get the most out of your money

When choosing Telenor it is possible to tailor your company's mobile telephony. You may freely combine Business Flex with our other Business subscriptions to ensure that all employees get a subscription that fits to their needs.

Business Flex adapts to the usage

Business Flex is a flexible and cost-efficient subscription which always gives you the best possible price. The subscription changes automatically between three price levels, which mean that the monthly costs will adapt to the actual usage. Surf and free internal calls are included – and there are no call attempt charges.

For people who talk a little, more and much

The flexibility attached to Business Flex means that the subscription fits most employees – those with a constant usage

of mobile telephony and those who in certain periods talk much or less.

Advantages of Business Flex

- Three price levels
- Changes automatically between level and price according to usage
- Up to 24 hours of usage per month
- Fixed price and usage ceiling
- Unlimited internal calls to colleagues

Mobile telephony with a discount

With Business Flex it is possible to obtain a discount which is very clear: The discount will increase with the number of subscriptions and longer binding periods. You may choose between binding periods of 12, 24 and 36 months in your agreement.

“Business Flex is our absolute most flexible subscription.”

Michael Garver Bargaard
Sales Director
Telenor Business
